

**TECHNICAL:**

**CUTTING & STYLING (INTEGRATED HAIR SYSTEM)**

**Items Needed:**

- Comb
- Clips
- Razor
- Blending Shears
- Cutting Shears

**Cutting & Styling:**

- Outer Perimeter
  - Design lines using a razor.
  - Soften and blend the desired length to work into growing hair.
  - Point cut the finished line of design to avoid harsh, blunt lines.
- Interior Layers
  - Lift and slither shear into design line.
- Framing Face
  - Slither the angle best suited to frame her face to give her the most complimentary look for her features.
- Bangs
  - Using an over directed section, cut length and angle for bangs to give a soft natural bang, not harsh.

**Always Remember:**

- For the most undetectable look, it is recommended to blend the client's natural hair and the hair of the hair system with a razor.
- To style, it's best to use a blending shear and to slither the shear carefully into the hair for the most complimentary look, as well as to avoid blunt lines.
- When cutting and styling is complete, apply pressure one more time to hair system by pressing it down onto the client's head before the client leaves. This ensures a solid bond.
